

TIPT4TIPS – ACCEPTANCE TEST (08/2018)

WEBSITE FEATURE TESTS

MES COMMENTAIRES:

17/08/2018

Bonjour Phillippe,

Voici mon **deuxieme test de recette** pour la partie **Web Application**

Cette fois ci, je reconnais qu'il y a moins de probleme que les tests de precedents, mais neanmoins, il reste encore **deux plantages**, celui de la creation du produit et de la creation du template.

Par contre il y a encore pas mal de remarques sur les ecrans, et ses petites erreurs.

- Du cote "**ergonomie**" l'application web est "sympa" et simple a utiliser.
- En ce qui concerne l'affichage des features, comme j'ai fait des remarques dans mes tests de recette precedents, il est preferable que la **presentation des features et leur workflow soit bien standardisee**.
Par exemple pour deleter un enregistrement (lead, tipster, produit, gift, catgorie,...) les workflows ne sont pas les memes. Pour Lead ou Tipster, l'application oblige l'utilisateur de passer d'abord par view avant de pouvoir supprimer l'enregistrement. Ce qui n'est pas le cas pour Product ou Categories ou Gifts... Pour region, on n'a meme pas le droit de view or delete...
- Il y a **quelques petites erreurs**, mais cela me fait douter sur les autres résultats du programme ... par exemple, lors de la suppression d'un message, le compteur "message supprime" n'incrémente pas automatiquement et j'ai l'impression qu'il reste complètement bloqué ?
- Il y a toujours des **petites manques de controle syntaxique** pour certains champs, ou des petites erreurs par ci par la, et ce qui rend la recette penible et difficile a accepter pour ce niveau, car pour moi lorsqu'on arrive a cette phase de recette, c'est a dire tout simplement que tous les tests unitaires et test d'integration de votre cote (technique et fonctionnelle) sont passees avec success a 100% (?).

Long Nguyen

HOME PAGE MESSAGE (COMPOSE)

The screenshot displays an email client interface. On the left is a dark sidebar with the 'AdminTip4Tips' logo and a user profile for 'Admin' (Online). Below this is a search bar and a menu with categories: MAIN (containing HOME, LEADS, and TIPSTERS), and ADMIN (containing USERS, PRODUCTS, PRODUCT CATEGORIES, GIFTS, REGIONS, and MESSAGES). The 'HOME' item is highlighted with a red box. The top navigation bar is blue, featuring a hamburger menu, a notification bell with a green badge showing '0', and the 'Admin' user profile. The main content area has a breadcrumb trail: 'Home > Mailbox > Composer new message'. A 'Compose' button is highlighted with a red box. To its left is a 'Folders' panel listing 'Inbox' (0), 'Sent' (3), and 'Trash' (1). The 'Compose New Message' form includes a 'To:' field with the recipient 'hoangnguyen - Hoang Nguyen', a subject field with 'Test email to Hoang Nguyen', and a rich text editor with various formatting options. A red callout bubble points to the recipient's email address in the 'To:' field, stating: 'BUG The email address of the recipient is correct, but he does not receive a message'. The email body contains the date '18/7/2018|', a test message, and a signature.

EDIT TIPSTER (Buy gift)

The screenshot displays the AdminTip4Tips web application. On the left, a dark sidebar contains navigation links: Admin (Online), Search..., MAIN, HOME, LEADS, TIPSTERS (highlighted with a red box), ADMIN, USERS, PRODUCTS, PRODUCT CATEGORIES, GIFTS, REGIONS, and MESSAGES. The main content area shows the 'Edit Tipster' form for a user named Hai Nguyen. Overlaid on this is a 'Points Action' dialog box. In the dialog, the 'Tipster' field is set to 'Hai Nguyen-Hai Nguyễn'. The 'Action' dropdown menu is set to 'Buy Gift' and is highlighted with a red rectangle. The 'Points' section shows a '+' radio button selected, a '-' radio button, and a text input field containing '5'. A red arrow points from the '-' radio button to a red warning box on the right. The warning box contains the following text:

WARNING

When the Tipster wants to select an item to buy, the system does not automatically calculate the point. The Consultant must calculate and need input manually into the system - - > need to improve.

Also, when Consultant needs update the score of Tipster after gift buying, he must choose (-), if forget, it will add new point to Tipster. This is a risky choice.

WARNING

First: It will be hard to delete old transactions in 1 shot. The application must have markers boxes, and/or the "All" option (for quick selection) to select the set of transactions to be deleted.

Secondo: It is better to have automatic purge management system to periodically purge old transactions.
