MOBILE FEATURE TESTS

MES COMMENTAIRES:

19/08/2018

Bonjour Phillippe,

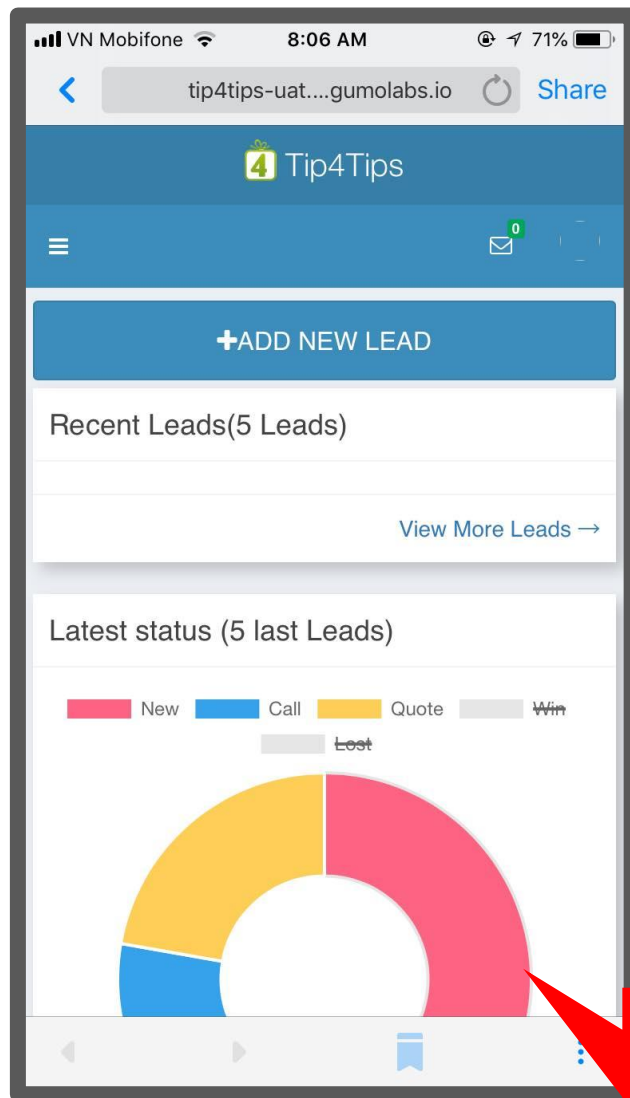

Voici mon **deuxieme test de recette** pour la partie **Mobile**.

En general je crois que l'application me semble simple, comprehensible.

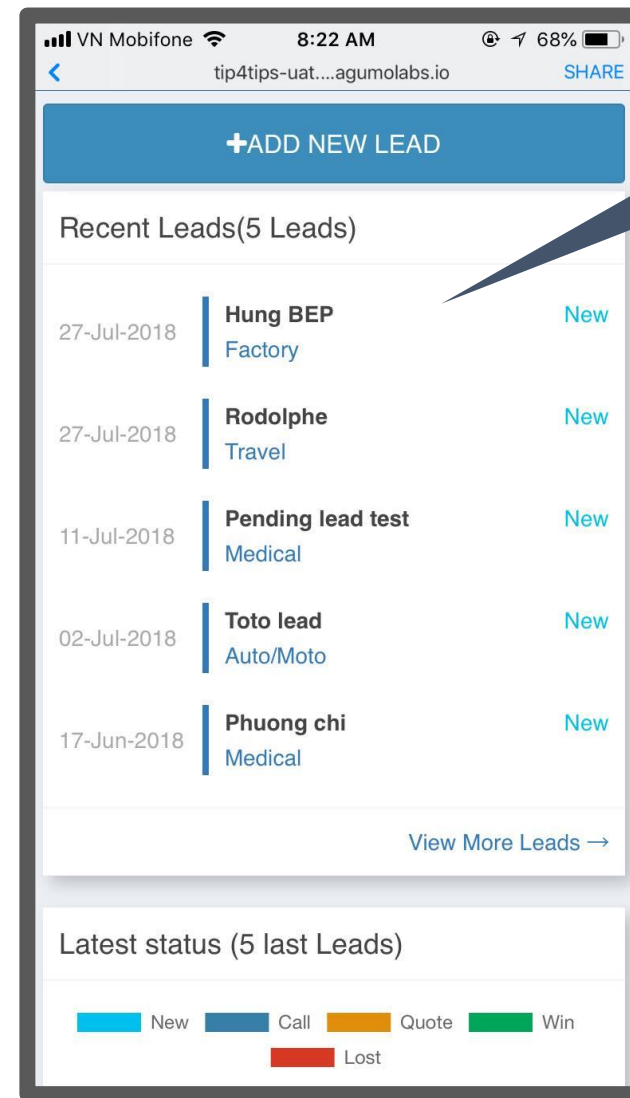

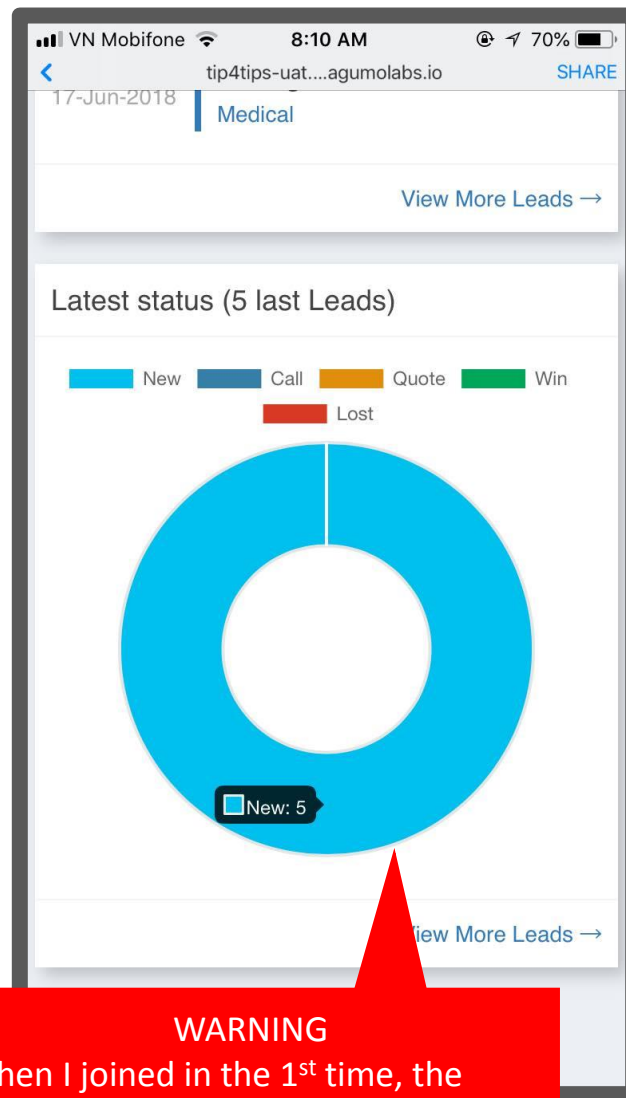

- Je n'ai pas pu detecter de gros bugs.
- Seul l'affichage de debut me semble un peu bizarre a chaque fois lorsque je me connecte sur l'application... C'est a dire je vois d'abord le camembert (la courbe graphique) avec plusieurs couleurs apparait d'abord avant d'enchaîner automatiquement sur le Home Page.
- Les features du module "My Lead" me semble correct. Peut etre il faut demander aux developpeurs **de renforcer les controles syntaxiques** de maniere plus intelligente (le champs du telephone, ou l'adresse email...)
ATTENTION quand meme, car **pour une meme fonction** (Add new Lead), on a **2 differentes procedures de travail**
- Par contre je suis surpris que **l'application ne permet pas au Tipster de visualiser son compte, ou d'accede au "Gifts" ou de placer ses commandes (?)**
Est ce que c'est normal ou prevu comme ca initialement ? car je pense sincerement que c'est important pour le Tipster de pouvoir tout faire avec son cellphone...
- En ce qui concerne le module message, pour l'instant le Tipster **ne peut que "Read"**. Il ne peut pas composer un new message, ni "Reply" ou "Delete" ses vieux messages. Est il normal ?
